

How to mine HRLD with your GPU on HaroldPool

For NVidia GPU's:

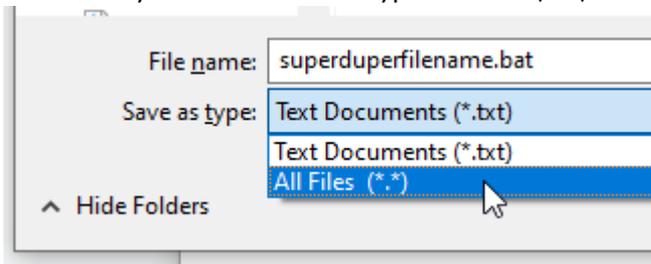

1. download the latest release of ccmminer from <https://github.com/tpruvot/ccminer/releases>
2. unpack the contents of the zip file to a folder of your choosing (possibly need 7-zip or winrar)
3. Open notepad
4. Copy/paste the following syntax:
`ccminer-x64.exe -a phi -o stratum+tcp://eu1.haroldpool.be:8333 -u your_wallet_address -p c=HRLD`
`PAUSE`
5. change **your_wallet_address** to the HRLD address where you want your rewards delivered.
6. Save the file as superduperfilename.bat in the same folder where the contents were unpacked
7. make sure you select "Save as type: All Files (*.*)"

8. Double click the newly created .bat file and start mining ☐ ☐

For AMD GPU's:

1. Download the latest release of WildRig from <https://github.com/andru-kun/wildrig-multi/releases>
2. unpack the contents of the zip file to a folder of your choosing (possibly need 7-zip or winrar)
3. Open notepad
4. Copy/paste the following syntax:
`wildrig.exe --print-full --algo phi --url stratum+tcp://eu1.haroldpool.be:8333 --user your_wallet_address --pass c=HRLD`
`PAUSE`
5. change **your_wallet_address** to the HRLD address where you want your rewards delivered.
6. Save the file as superduperfilename.bat in the same folder where the contents were unpacked
7. make sure you select "Save as type: All Files (*.*)"

8. Double click the newly created .bat file and start mining ☐ ☐
9. If you can't get it to work with Wildrig, try <https://github.com/KL0nLutiy/sgminer-kl/releases> (username your wallet address, password c=HRLD)

How to check your earnings/progress:

1. Go to <https://eu1.haroldpool.be>
2. click on 'Wallet' on the top
3. Enter your wallet address
4. click submit
5. happy trackings! :)
